Hello,

As a highly motivated and dedicated student pursuing a Computer Science and Engineering degree, I am eager to gain practical experience in a professional software development environment.

I am completing my third year of study in the Computer Science program. Throughout my coursework, I have gained a strong foundation in programming languages, algorithms, data structures, and software development methodologies. During my coursework, I had the opportunity to apply my knowledge through various coding projects and team collaborations.

In addition to my coursework, I've eagerly explored the world of software development by undertaking a range of personal projects. I've created web applications using HTML, CSS, and JavaScript, focusing on delivering user-friendly and responsive designs. I've ventured into mobile app development, crafting an iOS application using Swift, with an emphasis on intuitive user interfaces. My journey in programming has also led me to explore the intricacies of data structures and algorithms in C++, where I've deepened my understanding of performance optimization.

My pursuit of excellence in software development is fueled by a relentless curiosity and a commitment to delivering high-quality solutions. I am eager to leverage my existing skills and passion for technology to contribute effectively to your team and absorb invaluable real-world experience.
I appreciate your time and consideration and look forward to the opportunity to discuss how I can contribute to your organization and continue my growth as a software developer.

Best,
Cristian Garcia
